# LIKEABIRD

beySAT-BGAN

Offering reliable and secure connectivity to satisfy RPAS's CNPC requirements and enable regulatory compliance.

Satcom connectivity (optionally with Cellular), served by the Inmarsat ELERA L-Band network with up to 150 Kbps bandwidth, meeting competitive specifications suited to delivery, cargo, urban transport and surveillance markets in remote and rural areas where LOS and cellular data links fails.
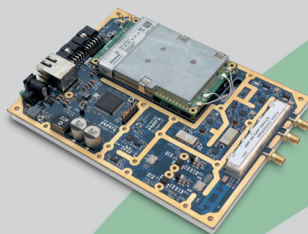

Enabling the drone ecosystem

beySAT-BGAN specifications

Size
110x110x50 mm

Weight
~270gms

Power
~ 6W

Hybrid Connectivity
with cellular/satcom routing

Low cost

Latency
guarantee of 1sec
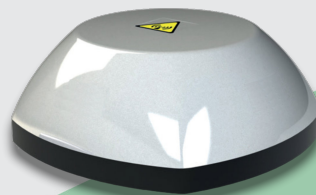

Competitive service Pricing

Evolution Roadmap

Talk to LikeAbird to see how the beySAT-BGAN can be integrated to your RPAS and customised to serve your drone safety needs.

Q3 2023

Type approved implementation with EAP customer

Complete safety solution integrating EC, remote ID, DAA, UTM services and Support for edge processing capability

Q4 2022

Low SWAP-C safety services Terminal available for EAP

Features:
- Hybrid LTE satcom connectivity
- Edge processing support
- Integration of EC & Remote ID
- Interfaces to DAA and UTM system
- EC and DAA services routing

Q3 2021

Proof-of-concept terminal available

Talk to us if you would like to partecipate in our „ EAP – Early Adopter Program".
